MEDOC is a contracting company that provides MEP (Mechanical, Electrical, and Plumbing) solutions for all the sectors. Moreover, we are specialized in HVAC (Heating, Ventilation, and Air Conditioning) systems. Our efforts to provide our customers with the best engineering solutions began in 1992. Since then, MEDOC has established its reputation of integrity in the market and succeeded to become a trusted company by its customers.

MEDOC proudly provides high quality, efficient and reliable solutions as well as excellent service before and after sales. This supports our mission of establishing solid relationships with our customers based on mutual trust and respect and ensures our persistence and continuity.

MEDOC provides the design, implementation and maintenance of all electro-mechanical systems covering all the industries: residences, hotels, restaurants, warehouses, malls, offices, etc...

Relying on more than twenty years of experience in the field, MEDOC reliably executes all its projects, meeting deadlines set and maintaining all international quality standards.

MISSION

We design, install and maintain end-to-end electro-mechanical solutions to provide the best engineering systems in our projects.

VISION

We always strive to be the leading provider of electro-mechanical solutions and services.

We provide the design of electrical and mechanical engineering solutions, the contracting expertise to complete the end-to-end installations, and the ongoing operation and maintenance services to provide our customers with uninterrupted functional systems. We are specialized in the field of HVAC (Heating, Ventilation, and Air Conditioning).

We have been providing our services for more than twenty years consistently, depending on our experience in the field and on our highly qualified personnel.

DESIGN

Our skilled team of engineers provide the design for all the components included in the electro-mechanical systems. We make sure that our design meets the client's needs under the highest engineering standards.

IMPLEMENTATION

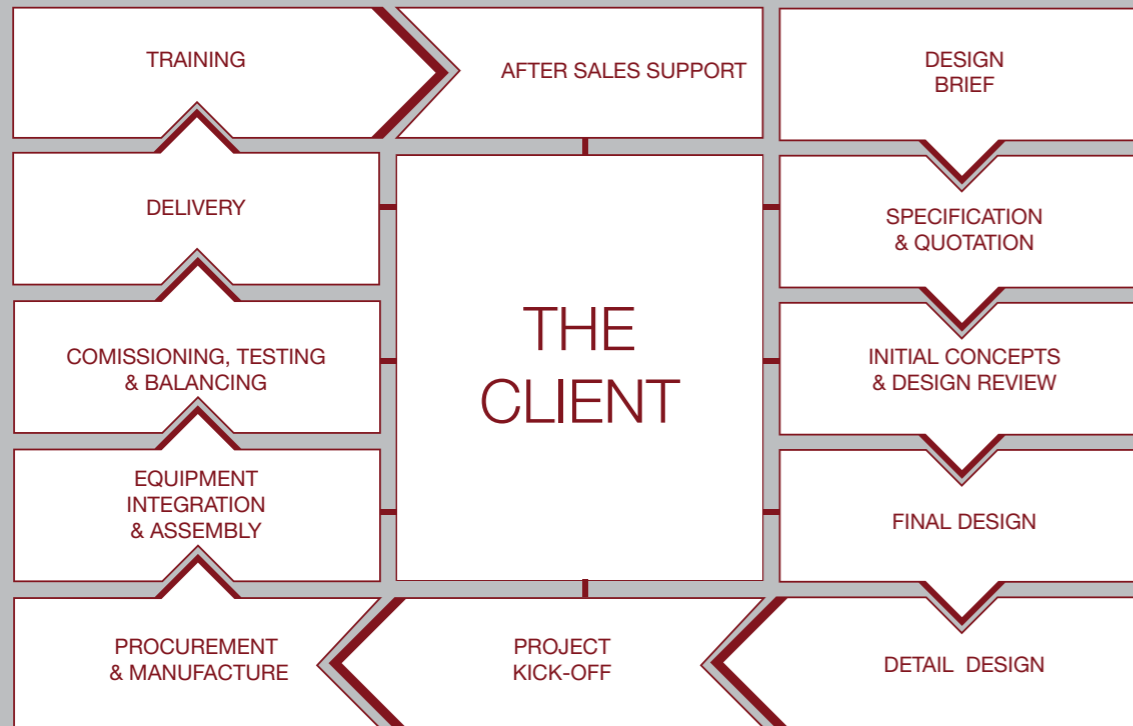

Our team of highly qualified engineers and technicians, equipped with their deep technical knowledge in MEP systems and with all the technology updates in this domain, execute all the projects professionally and with the highest quality standards.

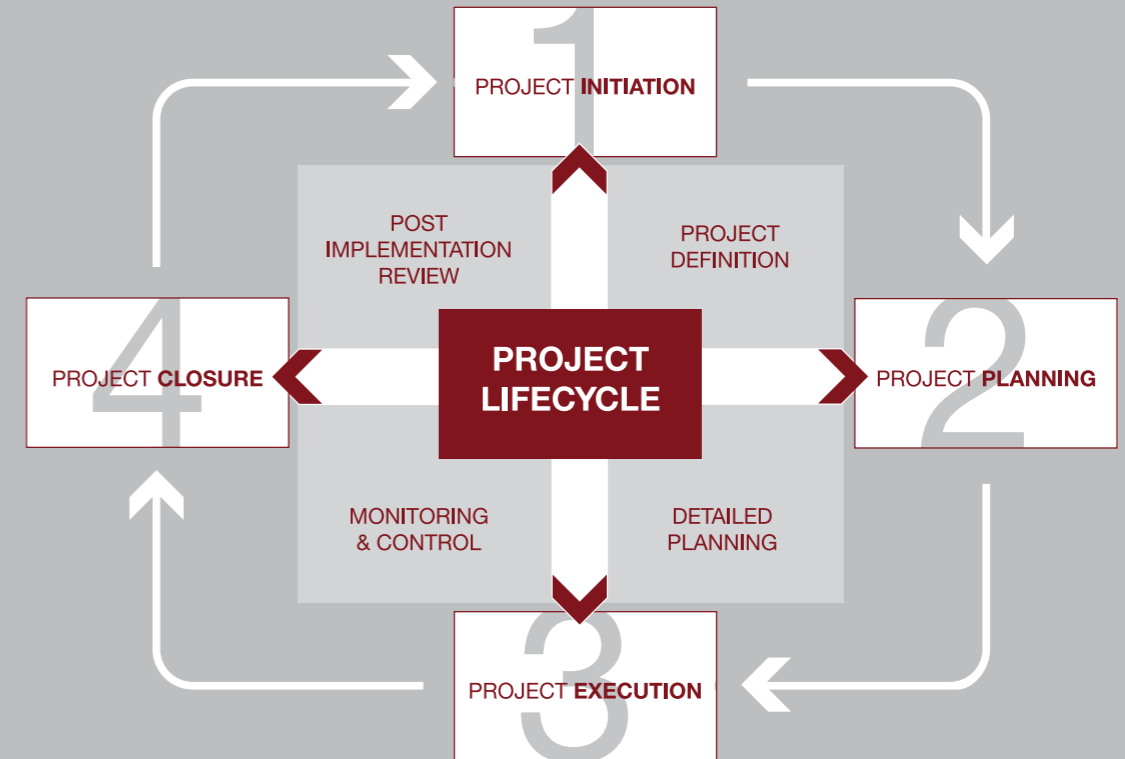

In addition to our experience in the field, we always strive to provide all our teams with the latest technologies to be able to provide our customers with the best service.

PROJECT MANAGEMENT

Of our main principles, a well-fitted project plan and a detailed follow up on the implementation are the key success of a project.

Relying on our highly qualified project managers who follow up on the execution closely on site, we make sure that our implementation meets the required standards and deadlines set.

MAINTENANCE

Armed with our deep faith that the after sales service is of extremely high importance for customer satisfaction, and that customer satisfaction is our main goal to maintain successful continuity, our highly-qualified engineers equipped with the latest technologic tools are available to make sure that in case of any disruption in the system, the primary concern will always be to professionally put it back in function in the fastest time possible.

AFTER SALES SERVICE
